## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

3. Claims 1, 3, and 5-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sawai et al (US Patent 4,118,192) in view of Arita et al (Biochem. And Biophysical Research Communications, 257, 1999, pp. 79-83) for the reasons of record.

In response to this rejection, Applicants argue that the monoclonal antibodies taught by Arita et al produced poor results due to the multimeric formation of adiponectin in plasma. Arita et al had to convert adiponectin to a monomeric form first before an accurate measurement of adiponectin can be done.

Applicant's arguments have been considered but are not convincing. Applicants should note that the 103 rejection is directed to using the polyclonal adiponectin specific antibodies of Arita et al on the latex particles and in the immunoassay of Sawai et al.

Art Unit: 1641

Thus, any alleged problems in using the monoclonal antibodies of Arita et al are moot.

With respect to pretreatment of a sample to obtain monomeric adiponectin, the instant claims fail to preclude such a step.

### ***Conclusion***

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
